

Lead with Intelligence. Build with Purpose.

Strategic, human-led AI solutions designed to help your health center scale forward with **confidence, compliance, and care.**

Conversational Agent

Provides natural, secure dialogue for scheduling, FAQs, triage, and more

Workflow

Automates multi-step processes like patient intake, referrals, and prior authorizations

Compliance & Guardrails

Ensures real-time policy enforcement and audit-ready documentation

Knowledge/Insight

Surfaces insights from clinical notes, documentation, and operational data

Decision Support

Assists clinicians and admins with real-time, rules-based recommendations

Creative/Generative

Drafts grant applications, SOPs, social posts, job descriptions, and more

Document & Form Processing

Extracts and processes forms, EHR records, PDFs, even hand-written notes

Task Execution

Executes repetitive, clearly defined tasks without constant oversight

Monitoring & Alerting

Observes systems, detects anomalies, and escalates alerts as needed

65%

of healthcare leaders are actively piloting or scaling AI projects

What could you achieve with more time, focus, and energy?

Unlock the time, clarity, and capacity your team needs to operate smarter and serve stronger.

- ✓ Improve patient care
- ✓ Strengthen security
- ✓ Scale with intention
- ✓ Restore work/life balance
- ✓ Save time and money
- ✓ Reduce cognitive load/retain talent

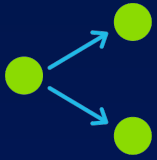

Artificial intelligence is quickly reshaping how organizations operate. RainTech helps you cut through the noise and adopt AI with confidence.

People First, PERIOD.®

Intelligent Automation

The foundation of RainTech's transformative AI solutions

RPA

Deterministic

Agentic AI

Probabilistic

Robotic Process Automation (RPA) follows strict, rule-based logic to complete repetitive tasks with little variation. E.g. Uploading patient insurance cards into EHR.

Agentic AI, by contrast, can reason, adapt, and make context-aware decisions across complex, variable scenarios. E.g. Interpreting a patient's unstructured intake note and suggesting risk factors for clinician review.

Intelligent Automation combines RPA (deterministic) and Agentic AI (probabilistic) to streamline both routine and complex workflows — together delivering more powerful outcomes to enhance the human experience.

Why Organizations Choose RainTech

People-Centric AI

Built to elevate your workforce through thoughtful, human-in-the-loop (HITL) design — not to replace it.

Security-First, Compliance Ready

Our AI was born in our security department — built for HIPAA, 42 CFR Part 2, and real-world risk.

Multi-Agentic AI

We build modular AI systems for better accuracy, faster tuning, and scalable; step-by-step intelligence.

Rapid Time-to-Value

Go live with a fully autonomous solution in as little as six weeks.

Bias-Minimizing Protocols

Ethical guardrails are baked into every model to support fair and responsible outcomes.

Flexible Integration

Deploys on-prem, offline, or in the cloud — tailored to your unique infrastructure.

Strategic Guidance

We help identify high-impact, budget-aligned AI use cases that match your organizational goals.

End-to-End Support

From discovery to deployment, with ongoing tuning, training, and change management included.

Month-to-Month Flexibility

No long-term lock-ins. Start small, prove ROI, and scale at your own pace.

Cut through the AI hype. RainTech helps you adopt AI with confidence, clarity, and care.
